I was born out of tragedy of my parents and twin brother loss of life in a road crash at the age of 17. I want to use my passion for writing to create a life beyond life. Living a healthy life and creating art is what drives me, it is everything I do. I am a Wellness coach and fitness instructor. Fitness is my passion - it is what I live for. The result was never going to be a true sense of satisfaction or anything resembling a justifiable peace of mind. It has been a most disruptive period during my life, one that I never expected or prepared for. I am still coming to terms with the loss, wondering what I have to look forward to now, searching for a new dream. The sudden crisis, at an age when most people expect to find their feet firmly on the ground, has left me shaken to the core. I continue to live in the house I grew up in, the only place that has ever known me, as if I have outgrown it. That is as far as it goes in terms of normal life for me. I could tell you about my sobriety if you wanted to know, for the last six months, that's the story I stick to. It's simpler for me not to discuss the more ambiguous details, because it's not something I have to repeat. It's just one of those stories that has a remarkable life of its own. It is not a life I can carry on any more, but I don't have to explain what it was like, or all the reasons why I decided to choose a different way. For me, it didn't make a difference. The decision was taken in my heart more than anywhere else, and I only wish I had been stronger enough to make it in my

What's New in the Poster?

Whenever an important event is about to take place, a lot of advertising is done so that people know it's happening and where. In urban culture, this can be seen as huge posters hanging above the street or glued to walls. Besides a special kind of printer to create such a big poster, one also needs applications like Poster. Rich library of examples and templates If the name didn't inspire you to think of the basic functionality, then you need to know it's an advanced drawing and editing tool with which you create posters. The visual design leaves a bit more to be desired, since all features are held in a classic window design that seems to fit better in the last decade. While the default poster that loads as a template can make you change your mind, the application is packed with quite an impressive array of tools, only limiting you to your imagination. What's more, there are tons of presets, examples, and templates to look over or even use to quickly start a project in case you lack motivation or inspiration. Choosing to create a new poster requires you to specify the type and size first, such as a result that fits on a regular A4 paper sheet, or custom size specifications for vertical and horizontal alignment, or even a long banner. There's also a built-in wizard that gradually asks for values to apply to your new canvas. Various import and edit options In terms of editing, the application provides the right means to both create and manipulate objects in almost any way possible. A rich library of presets lets you pick various objects, that can later on be edited by dragging the borders or accessing the properties panel for color and style. Besides drawing, you can import various cliparts, or external pictures. You can then spend some time to tweak colors, add blur, or adjust other visual settings, in case you haven't done any pre-processing to pictures. Since there also needs to be text on a poster, you get to insert text boxes that can be treated like regular objects. Text itself benefits from common style and font customization options, as well as an abundance of special effects that shadow, outline, blur, and a lot more visual tweaks. To sum it up All things considered, we come to the conclusion that Poster is a powerful application you can use to create posters for all kinds of events, even if no one other than you and your folks see them. The visual design leaves a bit more to be desired, but
