This application will run continually while your Smartphone or Pocket PC is turned on, even when the screen is off. It will continue to run when your device is put in Sleep mode to conserve battery life, the device is recharged, or the device is turned off. Private Tracker Pro is not a cell phone; therefore, there are no data charges. Only a WiFi connection is required to activate the application. Location service will not work indoors, and indoor location accuracy is approximately 10m (30 feet). When tracking is not active, the system will continue to log the user's activity automatically at a rate of 1 event per minute. Activating the location service is easy, and it only takes 1 minute to walk through the setup procedure. If the tracking system is off, the user will not be able to track the logged locations. Activating the location service is easy, and it only takes 1 minute to walk through the setup procedure. If the tracking system is off, the user will not be able to track the logged locations. While tracking, the user can access the log file for review at any time by selecting the Logfile icon on the main menu. The log file is available for export to a comma-separated values (CSV) file. Reviewing the locations that have been tracked is also easy:

- Select the Logfile icon on the main menu.
- Click the Logfile for information.
- The location is shown as a polygon, with the coordinates and zoom level.
- The user can move the map to the nearest location.
