The program provides an advanced Macro Creator functionality with the ability to create Auto Recording Events at specific time periods and the creation of Music Note and key Note events. One can create more than one Auto Recording Event for a single song. To do this, simply select the song you wish to perform and activate the Auto Recording Event feature with the desired start and stop time. KEYMACRO Features: Music Note: A Note Function which allows recording key information such as Chord, Melodic Line, Tonic, Harmonic, Octave, and Key Name. Key Note: A Note Function which allows recording Chord, Melodic Line, Tonic, Harmonic, Octave, and Key Name. All the features described above are embedded in the program, with users not having to search for them elsewhere. Another particularity of this software is the fact that the Auto Stop function will function every time the recording stops, with a warning that the function is about to be executed if needed. Moreover, a sub-menu is available for easy access to the Auto Stop function, where users can choose which recording or playback session to stop. Copyright Snapfiles.com. All Rights Reserved. To investigate the relationship between the integrative change of interleukin-2 (IL-2) and corticotropin-releasing factor (CRF) in patients with acute decompensated heart failure (ADHF). Thirty cases with ADHF were divided into the intervention group (n=14) and the control group (n=16) according to the random number table method. The intervention group received the basic treatment and Chinese herbal medication, and the control group received only the basic treatment. The serum IL-2 and CRF were measured before and after intervention in both groups. The clinical therapeutic effect in the intervention group was better than that in the control group. The levels of IL-2 and CRF increased after the treatment in both groups, and the difference was not statistically significant (P>0.05). In the intervention group, after the treatment, the level of IL-2 in the patients whose clinical therapeutic effect was excellent or good was higher than that in the patients whose clinical therapeutic effect was poor, and there was statistically significant difference (P 1d6a3396d6
