pi: password user: password serveur: password I've tried with and without AuthType Basic, with and without require valid-user but I can't get the same result as from the browser. Thanks in advance for you help. A: Your server is configured to require both password and username to log in. This is the
/etc/htpasswd file, after you run htpasswd: # /etc/htpasswd pi: pi:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx user: user:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx:xx
To get your server to authenticate with just a username, you
could use: AuthType

TIRANA (Albania), 11 December 2015 (İSRB) – A group of Kosovo Albanian students have returned home from Albania, after a two-day visit to the Embassy of the Republic of Kosovo in Tirana. The group, together with their teacher, participated in a roadshow organised by the Ambassador of the Republic of Kosovo to Albania, Mr Kreço Osmani, in celebration of the 70th anniversary of the diplomatic relations between the two countries. “It was a great and friendly meeting,” the students said, “and we got to know that Tirana is a very exciting and modern city.” “We have no worries about our future; we are successful and energetic. The Albanian language is our own mother tongue and our future – now and in the future – is very bright.” The students spoke of the positive attitude which Albanians have towards Kosovo. “We are proud to be an integral part of Albania,” the students said. “We would like to stress that we have also been proud of our country. Albanians should not be afraid of self-criticism.” “Now we are going to think about our country. Our ideas will help us create modern, democratic Albania. We will vote in the elections and demand that the rule of law prevails in our country. We should fight for freedom, fair elections and equal treatment for everyone.”Q: Create POJO class from string I would like to create POJO from String like this: JsonObjectBuilder builder = Json.createObjectBuilder(); JSONArrayBuilder arr = builder.add(Json.createObjectBuilder()); JsonStringBuilder str = builder.add(Json.createObjectBuilder()); str.add("Order_id").add(42); arr.add(str.build()); Object jsonObject = builder.build(); But what i am getting is: org.codehaus.jackson.map.JsonMappingException: Can not construct instance of test.pojo.Order: no
