Creative Styles Enable creative new ways to define your looks and your way of working. After Effects retains your styles and creatively sets up tracks in separate "tracks" in the Timeline panel. You can view and edit styles in the Timeline panel using the Pane > Styles Pane command. Easy texture mapping Send footage to Photoshop and bring your textures into Adobe After Effects CC with this new feature. After Effects CC simulates the appearance of videos composed of multiple layers when you apply texture. This feature makes it possible to apply simple textures in frames, lines, shapes, and animation. Ease of use With a new interface and the ability to open and use After Effects projects created with other applications, it is easier than ever for your team to collaborate on video projects. Export to Photoshop and Cinema 4D Send your creations to the desktop of your choice. After Effects exports to Photoshop and Cinema 4D in native resolution and output format, providing the most accurate results in each application. The Exporter lets you specify export settings for multiscreen output, including aspect ratio, pixel aspect ratio, color depth, and resolutions. Export to Adobe Premiere Pro All of your projects and compositions are saved in one file, for easier editing and export to other applications. Select the resolutions you would like to export your projects, and they will automatically be saved and ready for the output application. After Effects allows you to export with a preset export sequence. You can select basic, advanced, and XML settings for export, and even perform more advanced settings like dynamic resolution changes for specific video formats, such as MPEG, FLV, and WMV.
